#### **Non-GAAP Financial Measures**

To supplement the condensed consolidated financial statements prepared and presented in accordance with U.S. generally accepted accounting principles ("GAAP"), Udemy's key non-GAAP performance measures include Adjusted EBITDA, Adjusted EBITDA Margin, and non-GAAP income. We calculate Adjusted EBITDA as net loss (income) determined in accordance with GAAP, excluding i) interest expense (income), net; ii) provision for (benefit from) income taxes; iii) depreciation and amortization; iv) other expense (income), net, including gains and losses from the remeasurement of foreign currency assets and liabilities into their functional currency and v) non-cash stock-based compensation expense. We calculate Adjusted EBITDA Margin as Adjusted EBITDA divided by revenue for the same period. We have not reconciled our expectations for Adjusted EBITDA and Adjusted EBITDA Margin to net loss and net loss margin, respectively, the most directly comparable GAAP measures, because certain items are out of our control or cannot be reasonably predicted and a reconciliation for the guidance for Adjusted EBITDA and Adjusted EBITDA Margin is not available without unreasonable effort. As Adjusted EBITDA and Adjusted EBITDA Margin facilitates internal comparisons of our historical operating performance on a more consistent basis, we use this measure for business planning purposes. Accordingly, we believe that Adjusted EBITDA and Adjusted EBITDA Margin provide useful information to investors and others in understanding and evaluating our operating results in the same manner as our management team and board of directors. In addition, it provides a useful measure for period-to-period comparisons of our business, as it removes the effect of certain non-cash expenses and certain variable charges. We define non-GAAP income as net loss attributable to common stockholders, adjusted to exclude non-cash stock-based compensation expense and the amortization of acquired intangible assets. We believe the presentation of operating results that excludes these non-cash items provides useful supplemental information to investors and facilitates the analysis of our operating results and comparison of operating results across reporting periods. Udemy's non-GAAP financial measures may be different from non-GAAP financial measures used by other companies. The presentation of non-GAAP financial measures is not intended to be considered in isolation or as a substitute for, or superior to, financial measures determined in accordance with GAAP. Because of the limitations of non-GAAP financial measures, you should consider the non-GAAP financial measures presented herein in conjunction with Udemy's financial statements and the related notes thereto. Please refer to the non-GAAP reconciliations in this press release for a reconciliation of these non-GAAP financial measures to the most comparable financial measure prepared in accordance with GAAP.
